

## Book review by Alexander Blower

"Harry Potter and the Goblet of Fire" by J.K. Rowling

This is the fourth book in the Harry Potter series. In the story, Hogwarts is hosting the Triwizard Tournament against two other schools, Beauxbatons and Durmstrang. Instead of three representatives, the goblet of fire chose four, including Harry Potter, much to everybody's surprise. As he was too young, he didn't put his name in the goblet and there were supposed to be only three representatives. Each contestant had to face three difficult challenges that could cost them their lives.

My favourite part was when Harry opened the golden egg that he managed to grab after one of the challenges. I liked this part because it revealed the next task which seemed impossible. You can read "Harry Potter and the Goblet of Fire" to see what it is.

I recommend this book to anyone who likes mystery and adventure!
